

REMARKS

Claim 59 has been amended to conform to the language of its parent claim 41, by reciting the "pharmaceutical preparation" of claim 41.

Claims 61 and 62 have been amended to use the terminology of the specification.

Applicant elects the invention of Group VI. It is believed that this group includes claims 61, 62, 69 and 70. Claims 71-75 are dependent on claim 41 and are believed to be properly grouped with it in Group IV; these claims have therefore been indicated as "withdrawn" in the listing of claims.

Claims 61 and 62 have been amended as indicated, and new claim 83, somewhat similar to original claim 69, has been added. It is believed that this claim is properly grouped with claims in elected Group VI.

Applicant respectfully traverses the requirement for restriction with respect to claims 63-68 (Group VII). These claims are directed to a method of using the composition of claim 61 (in elected Group VI). Inasmuch as this is a national phase of a PCT application, it is believed that these claims meet the unity of invention requirements of the Rules and are entitled be examined together with the claims of Group VI.

Claims 1-40, drawn to non-elected inventions, have been canceled without prejudice to applicant's right to file a divisional application directed thereto.

Should the Examiner have questions or suggestions, he is urged to call applicant's undersigned attorney, J. Philip Polster, at 314-238-2400, extension 426.

Respectfully submitted,

Date: December 5, 2007

/J. Philip Polster/
